

Oregon Seagrass & Watershed Stewardship

Learn about the importance of seagrass beds in Oregon's coastal ecosystems and how to make this topic part of a meaningful watershed education experience with students. Educators will explore seagrass beds, engage in hands-on activities that they can share with their students, and learn about StreamWebs, a program that bridges STEM studies from the field to the classroom.

AUDIENCE: 6th-12th Grade Educators

LOCATION: Oregon Institute of Marine Biology
Charleston, Oregon

Saturday, May 13th
9:00 A.M. – 1:00 P.M.

Participants receive a \$50 stipend
and curriculum materials.
