

The Oregon Coast Aquarium is pleased to announce our theme for this year's Coastal Learning Symposium: *Focus on Coastal Ecosystems.*

Morning sessions will provide content knowledge and lesson ideas from both scientists and educators for major coastal habitats, including estuaries, tidepools, rivers, and forests. In the afternoon, you'll have the opportunity to explore these ecosystems with the experts at several natural areas across Lincoln County.

The Coastal Learning Symposium is an annual professional development opportunity for K-12 teachers and administrators in Lincoln County School District and beyond. The goal of this conference is to give educators content, activities, and resources to engage students in learning about the ocean and coastal resources.

Save the date for October 13, 2017 and stay tuned for more details in the Fall!
