FREE Professional Development

PLAYFUL MATH FOR EARLY LEARNERS 9-11 am

Research shows that children (and adults) retain more mathematical concepts when taught playfully. This workshop will show many ways that you can engage in playful math and how you can create a playful math learning environment in your program.

Attend both workshops & lunch is provided AND you get your own Beebot!

February 4, 2023
Bandon Public Library

USING BEEBOTS WITH EARLY LEARNERS 12-3 pm

Beebots are a great way to introduce technology and robotics into your program. Students will begin to learn programming, but more even more importantly they will learn computational thinking skills (algorithms, debugging, and more!) that will have a huge impact on their future educational development. In this workshop, you will get to see the Beebot in action and how you can incorporate it into your program.
