

Threats to Salmon

Salmon Stats

In small groups, students can discuss scenarios that include a potential threat to salmon:

1. Oil spill in an estuary
2. Oil spill in the open ocean
3. Fire that destroys trees on the banks of the rivers
4. Extra fertilizer in agricultural run-off from region next to river
5. Extra silt deposited into stream from landslide
6. Increased fishing limits for commercial fisheries
7. Decrease in dam bypasses- no fish ladders
8. Increased predation by sea lions or bears
