

# MWEE Implementation Plan Template

Use the prompts below to start planning your MWEE unit.

Teacher Name: \_\_\_\_\_

School Name: \_\_\_\_\_ Grade(s): \_\_\_\_\_

Number of students expected to participate: \_\_\_\_\_

## UNIT TITLE:

## Educational Goals / Standards Addressed:

### PREPARATION

- Describe the local environmental issue on which the students will focus:
- Do you have a “hook” to engage student interest? Describe:
- What community resources (people, organizations, materials) will you access to help students prepare for the field experience?
- How will you assess prior knowledge, attitudes, and possible misconceptions about the field site?
- How will you orient students to the field site?
- How will you provide students with an opportunity to practice new skills (with equipment, etc.) prior to going out in the field?

### ACTION

- Describe the location of the field experience(s):
- How will you use community experts and other resources during the field experience?
- What data will students collect, and how will it be used?
- What are some of the actionable items students might identify to improve or maintain watershed health?
- Describe any quantifiable student stewardship actions (i.e., trees planted, trash removed, invasive plants removed, water conserved) that could result from this project.

### REFLECTION

- How will students reflect upon and share what they learned from this MWEE?
- A primary goal of this project is for students to feel empowered to make a positive impact on the environment. How will you determine your students’ progress toward this goal?
