

**OREGON MARINE SCIENTIST  
AND EDUCATOR ALLIANCE**

## **Post-Town Hall Meeting Assessment**

Name: \_\_\_\_\_ Stakeholder you represent: \_\_\_\_\_

Which stakeholder group do you most disagree with? Explain their argument and describe your disagreement to the specific points in their argument.

What do you personally think should be done to address the issue of humpback whale entanglement? Which groups and which argument points support your opinion. Be detailed.

The North American Beaver is a keystone species. In the 1500's, trappers killed numerous beavers for their fur. This practice continued until the 1700's when the population of North American beavers depleted to the point of necessitating the elimination of shipments of beaver fur to European buyers. Today, the North American Beaver population is considered stable. If there had been a Town Hall meeting about the plight of the beaver, which stakeholders would have been represented? Why? What strategies do you think were implemented to save the beavers? Be realistic with your response.
