

Learn how to teach STEM and reading through picture books.

5 Week Online Course Fall 2019

Wednesdays
4:00pm - 6:00pm (PST)

September 25
October 2
October 9
October 23
November 6

Focus: K-6 teachers: The award-winning NSTA Press® Picture-Perfect STEM Lessons series combines science, technology, engineering, and reading in a natural way and provides easy-to-grasp background in STEM disciplines. The classroom-tested lessons clearly identify the appropriate NGSS standards and embed carefully selected reading strategies. This 5-week on-line course will introduce Elementary school teachers to the Next Generation Science Standards, how to use picture books in combination with ready-to-use student pages and assessments to aid in guided inquiry and communicate how to integrate language arts and STEM learning objectives in meaningful learning opportunities for students.

Cost: \$175

*2 Graduate Credits available from Western Oregon University for \$120 + \$20 non-admit fee

Materials provided:

Your choice of one Picture Perfect STEM Teacher's Guide (electronic), and selected lessons used in the workshops.

The authors of the Picture Perfect series, **Emily Morgan** and **Karen Ansberry**, will be teaching this course!

Advance registration for this on-line course is required and space is limited.
